

No UIKit, No SwiftUI
No Core

View :

- Forwards UI event to Interactor
- Listens to ViewState (Combine) update from Presenter

Interactor :

- Decides consequences of UI event (loading, routing, errors, ...)
- Listens to Workers
- triggers Presenter when needed

Presenter :

- Transforms RawModel(s) datas into viewStates

Router :

- Transforms Interactor Routing requests into UI

Worker :

- Any Service to the Interactor
